Unlimited Iridium to Iridium voice calls, using Iridium Handsets only.
 Not to be used with L-Band transceivers or Iridium GO! (subject to Iridium's FUP available on request). \$28.00 Monthly Fee

Allowance plans can be used with a standard SIM card which provides access to the network for voice, SMS and data services. Or a Crew Calling SIM which also allows use with pre-paid scratch cards (GoChat). This allows Crew members' onboard vessels to pre-purchase scratch cards to make calls separately to the monthly account calls. GoChat scratch cards are available on request.
 Allowance minutes for the 75 and 150 plans are voice only and for the 10 plan are voice and data (all plans exclude calls to other satellite networks). There is no rollover of unused minutes/SMS. Tick if required

When the payment of the monthly fee is 12 months in advance the minute/SMS allowance is applied on a monthly basis.
 The 75 and 150 allowance plans can be paid up front, there is no associated reduction.

+1 Access Monthly Fee \$9.00 Per Minute Rate \$2.05 Tick if required

This option provides a US (+1) phone number that is linked directly to your satellite phone, allowing the PSTN caller to be charged at International Call rates rather than the high charges for calling the 8816 Iridium code direct. The caller pays for the standard international call to the +1 number, the Iridium account holder pays for the satellite portion, charged at the rates on this agreement.

2 - Stage Dialling – provisioned as standard, opt out if not required. Tick if NOT required

This service also avoids high direct PSTN charges to the Iridium phone and offers a lower cost to the Iridium user. The caller first dials +1 480 768 2500 and follows the voice prompts to connect to the Iridium phone. The caller pays for this standard international rate call. The Iridium account holder pays for the satellite portion at a cost as stated above.

onsatmail

Iridium is a low bandwidth service and does not operate efficiently with standard email services. However, onsatmail is a specialised data transfer protocol designed for data transmission over low bandwidth. onsatmail reduces connection time and uses compression to provide a fast and reliable email service over satellite connections. The software is free of charge. To download the software and access the user guide go to: <https://www.theastgroup.com/uk/solutions/onsatmail>
