Automatic Satellite Phone Installation
Simply connect almost any satellite phone to the Red Box and it will be automatically detected, configured and made available for use, with no further interaction from the user.

Easy to Connect
The Red Box has a unique, simple user interface, allowing easy access from multiple users on different types of mobile or wired device. Access the Internet, send and receive emails, update social profiles and get weather forecasts fast, reliably and anywhere in the world, from any Internet enabled device.

Content Filtering & Access Control Policy
Full administrative control over what Internet data can be accessed through the Red Box. Individual user accounts allow accurate control over access and per user/per device access policies.

Firewall
The Red Box uses the **teleport-firewall** to restrict web access and lock down the computer to optimise data speeds and traffic, lowering the risk of overspend.

Onboard Server
Use the Red Box to store onboard music, documents and files and access them wirelessly, or wired, from multiple devices.

Integrated With

teleport-mail

Email up to 10x faster via satellite in an easy to use format. Spam and virus filtering plus smart automatic attachment blocking enables stress free emailing on the move.

teleport-blog

Individual or group travel blogs that can be updated via satellite or other Internet connections. Integrate photos, GPS position tracking and personalise the layout of each post. Group teleport-blogs for large events or races are available.

teleport-proxy

The ultimate web proxy for fast, cost effective web browsing. The teleport-proxy recompresses images and compacts HTML web pages to acheive up to 5x faster web browsing capabilities over low bandwidth connections.

teleport-weather

Global weather forecasts straight to your inbox. Many formats available, including GRIB and Synoptic Charts. Perfect for easy access via satellite Internet.

Specifications

Weight:	450g	**Interfaces:**	
Power:	3-4W	2 x USB	1 x Wireless antenna connector
Power Input:	7-20V DC	3 x LAN	1 x DC Power In
Dimensions:	318 x 307 x 28 mm		
Storage Capacity:	4GB (expandable)	**Connectivity:**	
Compatibility:	Iridium 9500-9575, 9522P & OpenPort/Pilot	Internet:	Local:
	Inmarsat Fleetbroadband	2 x LAN	1 x LAN
	Thuraya XT	4 x USB 3G Modem	1 x WiFi: (Std) 802.11bg 2.4Ghz
	Globalstar	4 x USB Sat Phone	(Optional High Power 200mW)
	VSat		
	3G Cellular & Wifi
